TRAC Oil & Gas achieve ZERO accidents or incidents in the first 4 months of 2010

Safety Record - 2010

After achieving an excellent safety record in 2009, the TRAC Oil & Gas team has continued this success into 2010. During the first 4 months of 2010, we have not only maintained our ZERO LTI record, but have recorded **ZERO accidents or incidents** of any kind throughout all on and offshore operations.

Safety Campaign

In 2009, TRAC launched its 'Think Safety...!' Safety Campaign, a series of monthly safety presentations covering both pro-active and reactive safety topics, which are delivered to all staff and customers in all locations.

TRAC General Manager Daniel Hawthorn commented:

'We are very pleased with the progress of our 'Think Safety...!' campaign and our success in achieving zero incidents to date in 2010 is excellent. Indeed, our last accident, a minor first aid case, was back in July 2009 so we are almost at 1 year accident-free. We are determined to achieve the highest standards of safety, and remain committed to combating complacency and focusing on continual improvement in this area.'
